*Simplicity in its application are in need of maturity of designers, both theoretically and practically. That does not mean the designers have to remove the design principles that are considered complex,*

*but still hold firm in the quality of work. Like for example the application of the theory of balance in a work does not only apply to the complex design, simplicity does not mean a design that just looks minimal, clean, and simple, a complex design in a processing can also be said that valuable design simplicity.*
